

**PPE PRODUCTS BY TORONTO STAMP**

# ANSWERING CANADA'S CALL FOR PPE

## Toronto Stamp—Over a Century of Service

For over 110 years, Toronto Stamp has been a leader of innovation in Ontario and committed to delivering quality customer identification products for our Canadian and international customers.

Whether it's the example of how Toronto Stamp helped Ontario develop its first license plate in 1907, or how in the face of COVID-19, we led the team who would build Ontario's first domestic supply chain and manufacture over four million face shields for Health Canada—we adapt to the needs of our times to serve our community.

Our core business is the production of customized signs, badges, stamps, and decals. But, in the early days of the COVID-19 pandemic it became clear that, as a small business, we needed to adapt in order to survive. The Toronto Stamp team took steps to retool our infrastructure to produce face shields and sneeze guards. Over a short time, this allowed us to become a leading supplier of quality-tested and Ontario Made Personal Protective Equipment (PPE).

*"We're partnering with Canadian industry and businesses so we can act fast to ensure our healthcare providers have the products and supplies they need to help Canadians. Together, we are mobilizing all of Canada to fight the spread of the virus."*

*"... we will begin receiving deliveries of face shields from Toronto Stamp very soon. They've shifted from their usual production of rubber stamps and ID badges, and will be providing millions of face shields over the next two months."*

— The Right Honourable Justin Trudeau, Prime Minister of Canada, April 18, 2020

## What Does Toronto Stamp Offer?

Our line of COVID-19 PPE products is called 'Protect Our People'. Our product suite includes: Bio-Barriers (also called sneeze guards), face shields, public safety signs and decals, AutoDispense hand sanitizers, protective gowns and gloves, and our soon-to-be-released intubation solutions.

All products are tested and approved, and most are proudly Ontario Made. Additionally, we have a **Class 1 & 2 MDEL** (Medical Device Establishment License) and continue to acquire industry certifications as we adapt to Canada's needs and move through this pandemic together.

You will find features and benefits of our PPE line in the following pages. Products are available now to meet both small and large orders. If there is a specific problem you face, or you don't see a product that fits your needs, talk with us and we'll try to co-create a solution with you. Reach out to us at any time—we firmly believe we're all in this together.

# BIO-BARRIERS (SNEEZE GUARDS)

## Designed to Shield and Protect

**The Centre For Disease Control (CDC) recommends the use of cough barriers or sneeze guards to prevent the spread of viruses like COVID-19.**

They recommend that during a pandemic, barriers should be part of all safe working environments where person-to-person interaction takes place.

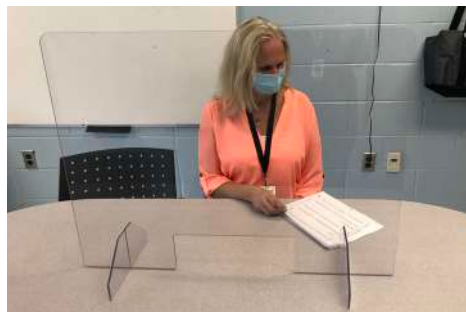

**Toronto Stamp Bio-Barriers** use high-performance 3/16 inch thick LEXAN® polycarbonate to provide a physical separation between people, helping to prevent the spread of COVID-19. Bio-Barriers hold many advantages over their tempered glass or plexiglass counterparts—they are harder to damage or chip (*reducing the risk of lingering bacteria and viruses*), are far stronger than glass alone (*250x stronger*), and their enhanced strength means you don't have to worry about sharp impacts, aggressive cleaning solutions, or damage caused by people leaning on them. Other, cheaply-made barriers are unlikely to withstand the rigors of daily wear and tear and frequent disinfecting as recommended by the CDC.

Our Bio-Barriers are optically clear, easy to install and remove, and simple to sanitize. Specially formulated to be shatterproof and lightweight, they are FDA-compliant, flame retardant, and highly resistant to acids and chemicals. This makes them versatile and ideal barriers in almost any work setting.

*The New York State Education Department requires that sneeze guards or clear plastic barriers be made from polycarbonate to comply with fire codes. Plexiglass does not meet NYSED or Code standards for fire resistance.*

The Barriers are available in both vertical and horizontal orientations and include a convenient opening for the passage of items while minimizing contact. We have several sizes in stock, ready for immediate shipment or pick up. We also offer quick-turnaround times on custom sizes and shapes—including Barriers that bend around corners—with multiple mounting options. Contact us today and let us know how Toronto Stamp can help.

**Perfect For:** Educational Environments, Receptions, Customer Service & Sales, Hospitality & Tourism, Healthcare, Transportation, Grocery Stores, Offices & Workplaces, Warehouse & Assembly Lines, Banks, Salons, Pharmacies, and Public Spaces

# AUTODISPENSE HAND SANITIZER

## What We All Need Right Now—Hands-Free Sanitization

The **AutoDispense Hand Sanitizer** by Toronto Stamp ensures that your team has easy access to disinfectants, allowing them to reduce the spread of germs. Our units combine bulk sanitizer supply with hands-free technology. These compact units utilize touchless sensors, are built to withstand heavy usage, and are designed for installation in a variety of locations including multi-person offices, schools, universities, gas stations, restaurants, industrial warehouses and more.

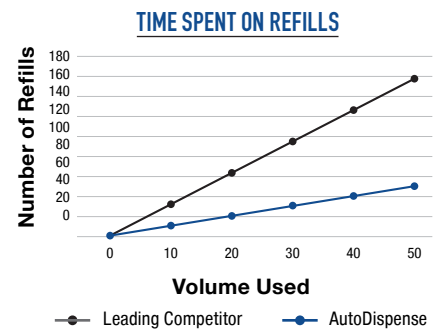

Our **No-Stand Mounting Kits** allow for easy installation into almost any environment—including public transportation such as subway trains and buses.

## Features and Benefits

- **Time Savings:**\* Our average system requires **3x fewer refills than our competitors** which means less maintenance time. Industrial & factory installations require up to 15x fewer refills.
- **Cost Savings:**\* The AutoDispense system uses non-proprietary sanitizer, adjustable dispense volume settings to help control costs, and requires less maintenance for an annual savings of nearly \$4,000. **On average, that's a 65% annual savings.**
- **Touchless Dispensers:** 100% hands-free, requiring zero contact, which reduces the chance of spreading germs or viruses via touch on high-traffic surfaces.
- **Mount Anywhere:** We have a variety of stands and No-Stand Mounting Kits that allow you to place our compact hand sanitizers almost anywhere—factory assembly lines, escalators, buses, and more.
- **Sanitizer Options:** Use either gel or liquid sanitizer—traditional or non-alcohol versions—perfect for settings where public safety is a concern. No expensive proprietary refill systems or restrictions.
- **Multiple Container Sizes:** Sanitizer containers are available in a variety of sizes to fit your individual requirements—240 mL to 19 Litres. Industrial installations include 208 Litre options.
- **Power Options:** Choose from standard corded 120V AC, 12V DC, rechargeable or standard batteries. The 12V DC system is perfect for transportation—tie the wiring directly into the vehicles power supply.
- **Customizable Branding:** Stands are available in almost any colour. Branding options are also available.
- **Bulk Savings:** Buy sanitizer in bulk and save. No need for individual disposable containers. We offer bulk supplies of traditional or non-alcohol gel or liquid sanitizer. FDA approved, in stock, ready to ship.
- **ACA and ADA Compliant:** Systems meet all Accessible Canada Act and Americans with Disabilities Act regulations. Dispensers can be mounted at lower heights, accommodating people of all sizes.

\* Calculations are based on a typical 4 Litre (1 gallon) liquid sanitizer system—numbers rounded for simplicity.

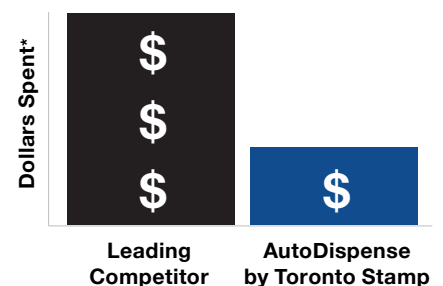

**3x**  
FEWER REFILLS

**65%**  
ANNUAL SAVINGS

## ANNUAL COST OF SANITIZER

# AUTO DISPENSE TRANSPORTATION SOLUTIONS

Public transportation is a major part of many lives, whether it be taking the school bus as a kid, or catching the subway as an adult. These modes of transportation are often overflowing with people, which means they're also overflowing with germs.

**AutoDispense Hand Sanitizers** are an easy way to prevent the spread of these germs. Toronto Stamp has several hands-free automatic options that work extremely well in public transportation, the **Transportation Mounting Kit** being our most popular. The Transportation Mounting Kit is available with a battery pack or a 12V DC connection which allows it to be wired directly into any public transportation vehicle.

Touchless hand sanitizers are suitable for installation in buses, subways, trains, taxis, terminals, elevators and escalators, and any public space.

## AutoDispense Transportation Mounting Kits

CODE	DESCRIPTION
POP-AD-MK-1V	Kit for 1" vertical pipe/bar
POP-AD-MK-1.5V	Kit for 1.5" vertical pipe/bar
POP-AD-MK-2V	Kit for 2" vertical pipe/bar
POP-AD-MK1H	Kit for 1" horizontal pipe/bar
POP-AD-MK-1.5H	Kit for 1.5" horizontal pipe/bar
POP-AD-MK-2H	Kit for 2" horizontal pipe/bar

All mounting kits include tube, wire, and mounting bolts for the dispenser.

Don't see something that will work for you? Let us know. We'll find a mounting solution that works for **your** vehicle.

# AUTO DISPENSE INDUSTRIAL SOLUTIONS

The **AutoDispense Industrial System** by Toronto Stamp has been specially designed for warehouses and factories. With a bulk supply that can feed up to 60 dispensers within a 500 foot range, this system is perfect for supplying a large area with sanitizer stations. Plus, the bulk supply ranges from 19 to 208 Litres, making it so your team doesn't waste time filling hand sanitizer dispensers all day. Even our smallest size for the industrial system requires 15x fewer refills than a competing 1200 mL system.

**15x**  
FEWER REFILLS

**\$12,000**  
ANNUAL SAVINGS

## Features and Benefits

- **Industrial Grade:** The dispenser is industrial grade and has been proven to run in many industrial environments for many years. Bulk supply can feed up to 60 dispensers within a 500 foot run, and requires 60 PSI of air for operation.
- **Cost Savings:** The AutoDispense system uses non-proprietary sanitizer, adjustable dispense volume settings to control costs, and requires **15x less refills and maintenance for an annual savings of over \$12,000 a year** (with a 20 dispenser system using 19 Litres of sanitizer per week). The upfront cost of the AutoDispense system is quickly made up for in operational savings.
- **Touchless Dispensers:** 100% hands-free, requiring zero contact which reduces the chance of spreading germs or viruses via touch with high-traffic surfaces.
- **Mount Anywhere:** We have a variety of stands and No-Stand Mounting Kits allow you to place our compact hand sanitizers almost anywhere—factory assembly lines, warehouses, common areas.
- **Sanitizer Options:** Use any brand of gel or liquid sanitizer—traditional or non-alcohol versions, perfect for settings where public safety is a concern. No expensive proprietary refill systems or restrictions!
- **Multiple Container Sizes:** With several options available, there is sure to be a pump that fits your needs. Our 19 and 208 Litre options include a pump that attaches to a stand next to material container, whereas the 26 Litre system has an included reservoir.
- **Bulk Savings:** Buy sanitizer in bulk and save. No need for individual disposable containers. We offer bulk supplies of traditional or non-alcohol gel or liquid sanitizer. FDA approved, in stock, ready to ship.

# SOCIAL DISTANCING/COVID-19 SIGNS & DECALS

## Make Your Message Stick—Toronto Stamp Has You Covered

To help prevent and reduce the spread of COVID-19, public health experts and government agencies recommend that *all* businesses and public spaces:

1. **Practice smart social distancing** by creating 6-feet of space between guests or customers with **heavy-duty, non-slip social distancing floor decals**.
2. **Post signs** promoting the use of individual public health measures to staff and customers to prevent the transmission of COVID-19.

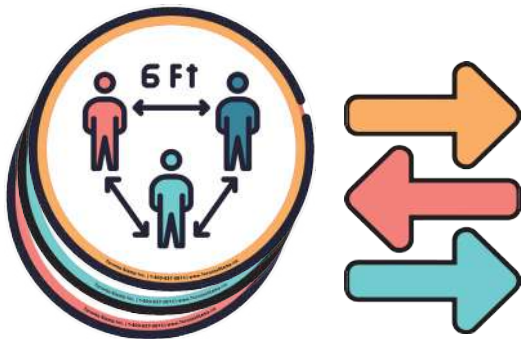

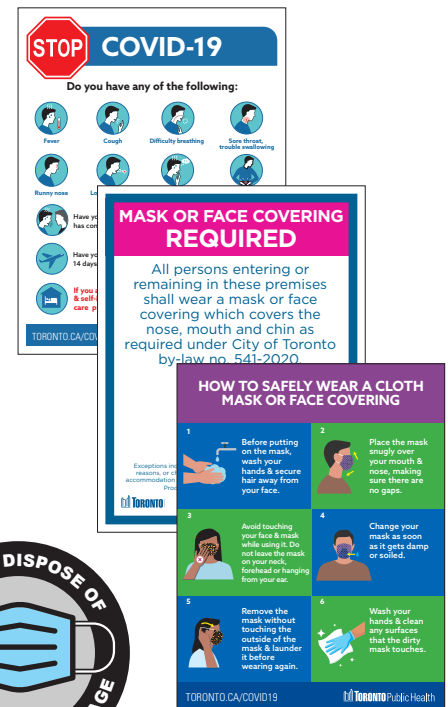

Whether it's non-slip floor stickers for social distancing, signs and arrows to control traffic flow, reminders to wash hands, wear a mask, or screen for symptoms, Toronto Stamp signs and decals have you covered. Our decals adhere to floors (carpet, tile, hardwood, concrete), walls, windows, mirrors, metal, rubber, plastic, and almost any other surface.

Crafted with heavy-duty, non-slip 3M vinyl, our decals are easy-to-apply, are removable, and are designed to withstand high-use traffic and repetitive cleaning. They're designed to resist ripping or tearing, and are easily removed leaving behind no residue (*we suggest using a heat source like a hair dryer when removing*).

We have many standard designs in stock and ready for immediate shipment, or you can work with our design department to match your specific needs—you can choose any color, design, shape, or size—from a tiny 1/4" sticker to wrapping an entire bus or building. Contact us today to get a custom quote.

### Features & Benefits:

- Heavy-Duty, Premium 3M Vinyl
- COVID-19 Specific Designs
- Non-Slip, Water-Resistant Surface
- Easy Application, Peel & Stick
- Sticks to Almost Any Surface
- Wear & Tear-Resistant Material
- Easily Removed with No Residue
- In Stock with Fast, Affordable Shipping
- Custom Designs & Personalization

# FACE SHIELDS

## Face Shields Designed to Protect Our People

As a local manufacturer and distributor of Personal Protective Equipment, Toronto Stamp has become an essential link in Canada's healthcare supply chain. In response to Health Canada's call for PPE, we adjusted operations to manufacture over 4 million face shields in less than two months. We have designed and can distribute several face shield options, and we have developed one of the first vertically integrated PPE supply chains in Canada.

### Outdoor Face Shields

- Medium-Duty Design, 0.017" Polypropylene
- Thick Foam Headband for Extended Wear
- Suitable for Glasses/Goggle Wear
- Optically Clear, Large Visor 9.5" w x 16" h
- Shatterproof, Impact Resistant, Anti-Fog
- Reusable Design, Replaceable Shields

### Commercial Face Shields

- Lightest Face Shield on the Market
- Headband has a Lifetime Guarantee
- All-Day Comfort, Built-In Ear Savers
- 0.004" Clear, Anti-Fog, Anti-Microbial
- Wide Visor, Good for Glasses/Goggle Wear
- Reusable Design, Replaceable Shields

### Consumer Face Shields

- Disposable, Full-Length Facial Protection
- Lightweight, Clear Visor, Maximum Visibility
- Easy-to-Adjust, Thick Foam Headband
- One-Size-Fits-All Design, Adjustable Elastic
- Lightweight, Anti-Fog, Breathable Design
- Suitable for Multiple Environments/Uses

# FACE MASKS

## Single-Use Face Masks

We offer a wide-range of N95, ASTM-rated, and general purpose face masks in a variety of styles, specifications, and quantities. Let us know your requirements and we'll help you get what you need.

We know you're looking for transparent supply chain relationships as well as ongoing and reliable product supply. As a trusted partner, we do this in a variety of ways. We're increasing our manufacturing of Ontario Made PPE, leveraging our global relationships with suppliers to get products to our customers as quickly as possible, aggressively evaluating additional suppliers to diversify product options, and collaborating creatively with public and private sector companies. Our mission is now more important than ever as we work to quickly to get critical supplies into the hands of Canadians.

## Protect Our People Release Program™

Ask about our Release Program™, created to allow our customers to leverage volume purchasing while ensuring an ongoing, just-in-time supply without the hassle of on-site storage. Ask us for details, or for further assistance.

# DISPOSABLE SINGLE-USE GOWNS

## Single-Use, Disposable Isolation Gowns

These polyethylene, non-surgical isolation gowns are easy to put on and take off. The full length, long sleeve style provides full coverage. The sleeves include a thumb loop to secure the sleeve.

Under the Association for the Advancement of Medical Instrumentation (AAMI) Guidelines, protective apparel must meet minimum performance standards for strength, barrier protection and fluid resistance to ensure the safety of healthcare workers. These gowns have been tested for compliance with ANSI/AAMI PB70:2012 Minimal Barrier Performance Level 2 requirements.

## Features and Benefits

- **Tested for Compliance:** ANSI/AAMI PB70:2012 Minimal Barrier Performance Level 1 and Level 2
- **Personal Protection:** Standard safety, strength, barrier and fluid protection
- **Economical, comfortable and reliable** protection
- **Easy On:** Simple and effective coverage
- **Easy Off:** Back side is marked and perforated for quick removal
- **Full Coverage:** Full length with limited openings, long sleeves, & sealed back
- **Sealed Sleeves:** Sealed sleeve ends with openings for hand
- **Thumb Loops:** Secures cuffs under gloves, enhancing leak protection

Perforated Back  
for Easy Removal

Fully-Sealed  
Sleeves

Gloves Cover  
Hand Openings

Made From Virgin  
Polyethylene (LLDPE)

# DISPOSABLE SINGLE-USE GLOVES

## Single-Use Gloves

Medical-grade gloves are essential protection during the COVID-19 outbreak. They help protect against the virus by providing a barrier to prevent potential exposure, and help to slow the spread of the disease. Made from latex-free nitrile material, our gloves offer better elasticity than vinyl gloves, better puncture resistance than latex, and better chemical resistance than either. Available in sizes small, medium, large & extra-large.

## Protect Our People Release Program™

Ask about our Release Program™, created to allow our customers to leverage volume purchasing while ensuring an ongoing, just-in-time supply without the hassle of on-site storage. Ask us for details, or for further assistance.

# CANADA TRUSTS TORONTO STAMP

## Superb Customer Service

Toronto Stamp is proud to be a 100% Canadian, minority- and women-owned business. We've been in operation since 1907, and know that customers are at the heart of all we do.

## Our Business is Based on These Principles:

- **Ongoing Improvement:** We are committed to continued improvement and refinement of our products to ensure they are always best-in-class. As such, our R&D is an integral part of our process and we work closely with customers and key-stakeholders across medical, industrial, and government sectors to deliver the best value, comfort, and quality PPE products possible. Feedback is continually sought from consumers and engineering experts on a regular basis.
- **Customer Service:** We believe in having superb customer service, fine attention to detail, reliable timelines, and in serving our customers and communities with great care.
- **Our Team:** We believe in our employees, and work at providing a rewarding environment where all can thrive.
- **The Environment:** We are proud to be a green rubber stamp company, and in addition to efficiently recycling and reusing materials, our manufacturing plant is completely chemical-free.

Thank you for taking the time to read about Toronto Stamp, our history, products, and commitment to supporting Canadians during the COVID-19 pandemic.

If there is a specific problem you face, or you don't see a product that fits your needs, talk with us and we'll try to co-create a solution with you. Reach out to us at any time—we firmly believe we're all in this together.

*"Ontario is truly Canada's workshop. We can make anything here and Toronto Stamp's efforts are clear proof of that... Toronto Stamp's expansion of its facilities will support our frontline heroes in the fight against COVID-19, help businesses reopen safely and protect their customers and workers, and create good jobs for people right here in Ontario."*

— Doug Ford, Premier of Ontario, March 2020

In addition to PPE,  
Toronto Stamp also offers:
